# It's All About Achieving the "Light Bulb Moment"...

...the moment you find that critical piece of evidence that builds your case and tips the odds of winning in your favor. Fios simplifies the complex, often intimidating, process of electronic discovery so that you can efficiently review enormous amounts of electronic evidence and boil it down to what is relevant.

## Unprecedented Customer Focus to Ensure Your Success

We aren't going to tell you that it's always easy, but the benefits are worth the effort! In fact, electronic discovery is now essential. Fios helps you ensure a legally defensible audit trail and increase your likelihood of success, by providing the following **Electronic Discovery Services**:

- **Litigation Readiness** – Eliminate the crisis management approach and establish an actionable, repeatable litigation response process, customized for each business.
- **Discovery Strategy** – This suite of services is the foundation for all others. Our savvy team of experts assist you with evaluating your options and determining the best course of action each step of the way, and then ensure flawless execution on the strategy. Services include:
  - Data Preservation Strategy
  - Evidence Collection Strategy
  - Data Reduction Strategy
  - Burden Analysis
  - Review Strategy
  - Expert Testimony
- **Evidence Collection** – We help you identify, understand and properly collect the universe of potentially responsive data. Seamless integration with our downstream processing ensures fast, accurate, cost effective results.
- **Evidence Processing** – Fios is one of a few tier 1 electronic discovery service providers. We've been in this business from the beginning and have built a "factory" that can handle even the largest, most complex projects. And, if we can't, we'll tell you.
- **Evidence Review** – Prevail® is Fios' powerful, yet easy to use, web review tool – giving you remote and secure access to your data from anywhere.
- **Evidence Production** – Take advantage of a variety of delivery options, including: web repositories, exports to other database environments, native files on CD or paper.

## Knowledge is Power!

As a legal professional, we know you hunger for knowledge and there is a lot to stay on top of in the area of electronic discovery. To help you understand the quickly changing world of e-Discovery, Fios is pleased to offer the following at [www.fiosinc.com/sampleoregon](http://www.fiosinc.com/sampleoregon)

Sample Fios and sample Oregon: We will be giving away 20 \$50 gift certificates to Made In Oregon, which offers the best in Oregon foods, wine and microbrews!

- **FREE GUIDE BOOK:** Hot off the presses, Fios just published our new "Process of Illumination: The Practical Guide to Electronic Discovery." This guide is packed with useful information, tips, tools and templates. 150 pages of practical content and it's yours for the asking.
- **ONE-HOUR WEB CASTS:** Visit our site for a current listing of topics, dates and times. Our subject matter experts cover a range of current topics.
- **www.discoveryresources.org:** Fios is the primary sponsor of this information portal on electronic discovery. Visit today and check out the new column by Dennis Kennedy and George Socha!
- **ED-TV (Electronic Discovery – Truth and Vision):** Don't miss receiving monthly episodes of our popular new eNewsletter. Sign up today to receive the latest episode!

### The "Fios Factory" can be compared to a "blamp" (blender/lamp.)

**Ingredients:** Massive amounts of disparate data from any number of devices and custodians across your systems and networks.

**Processing:** Once inside the "Fios Factory blender," your data is carefully inventoried, assigned a unique FENS® number, and classified by file type. We then create MD5 hash codes, unzip and decompress the files and extract all email, keeping the relationships intact. Our process identifies duplications and provides you with various options that enable you to focus in on just the relevant information. Finally, we convert the data to a common file type (i.e., HTML or TIFF) for review and index the data to enable searching.

**End Result:** A smooth, efficient data review to give you that "ah ha moment" when you uncover the evidence that will help you win the case.
